

Environmental Policy

We are aware that our operations have an effect on the environment, however minor. As a consequence we are committed to further minimising our impact on the environment through a process of continual improvement.

In particular Andalus Solutions will:

- (i) Meet and where appropriate exceed the requirements of all relevant environmental legislation;
- (ii) Promote recycling and the use of recycled materials, while reducing the consumption of raw materials wherever possible;
- (iii) Minimise waste in all our operations;
- (iv) Invest in improved energy efficient products and minimise our total energy usage;
- (v) Dispose of all waste through safe and responsible means;
- (vi) Reduce our contribution to the creation of greenhouse gases by utilising greener forms of transport wherever practical;
- (vii) Work with our suppliers and customers to minimise the environmental impact in their dealings with us;
- (viii) Promote an eco-friendly environment within our surroundings; and
- (ix) Conduct an annual evaluation of our performance in meeting these particulars.

The company directors are fully committed to the implementation of this policy.
